Volume 2

Lead, Company, Contact, Opportunity & Activity Management

Table of Contents

1. Lead Management
2. Company Management
3. Contact Management
4. Opportunity Management
5. Activity Management
6. Lead Assignment
7. Lead Qualification
8. Lead Conversion
9. Sales Pipeline
10. Business Rules
11. Notifications
12. Reports
13. Database Design
14. API Specifications
15. Acceptance Criteria

CHAPTER 1 – LEAD MANAGEMENT

1.1 Purpose

The Lead Management module enables the organization to capture, track, qualify, nurture, and convert business prospects into customers while maintaining a complete interaction history.

1.2 Lead Sources

- Website
- LinkedIn
- Facebook
- Instagram
- Google Ads

- Google Search
- Meta Ads
- Referral
- BNI
- Email Campaign
- Cold Calling
- Walk-in
- Trade Show
- Existing Customer
- Partner
- WhatsApp
- Manual Entry
- API Integration

1.3 Lead Screen Layout

Header

- Lead Number (Auto-generated)
- Lead Date
- Lead Owner
- Assigned To
- Status
- Temperature

Company Information

- Company Name
- Industry
- Website
- Address
- Country
- State
- City

Primary Contact

- Name
- Designation
- Email
- Mobile
- WhatsApp
- LinkedIn

Business Information

- Interested Products (multi-select)
- Estimated Deal Value
- Expected Closing Date
- Budget
- Decision Maker
- Competitors
- Business Requirement

Marketing Information

- Lead Source
- Campaign
- UTM Source (optional)
- UTM Medium (optional)
- UTM Campaign (optional)

Remarks

- Lead Notes
- Internal Notes

1.4 Lead Status

- New
- Assigned
- Contacted
- Follow-up
- Meeting Scheduled
- Meeting Completed
- Demo Scheduled
- Demo Completed
- Proposal Sent
- Negotiation
- PO Expected
- Won
- Lost
- Hold
- Duplicate
- Invalid

1.5 Lead Temperature

- Cold
- Warm
- Hot

Automatic Rules

Cold

- No response after 3 attempts
- Budget unavailable
- Requirement after 12 months

Warm

- Interested
- Discussion in progress
- Demo required

Hot

- Budget approved
- Decision maker involved
- Proposal requested
- Expected closure within 30 days

1.6 Lead Scoring

Criteria	Score
Email Opened	5
Website Visit	5
Phone Connected	10
Meeting Conducted	20
Demo Completed	20
Proposal Requested	30
Budget Confirmed	30
Decision Maker Met	40

System automatically calculates:

- 0–20 = Cold
- 21–60 = Warm
- Above 60 = Hot

CHAPTER 2 – COMPANY MANAGEMENT

Purpose

Maintain a single master record for every organization and avoid duplicate entries.

Company Profile

General

- Company Code
- Company Name
- Legal Name
- GST
- PAN
- Website

Business

- Industry

- Employee Count
- Annual Revenue
- Nature of Business

Location

- Address
- City
- State
- Country
- PIN

Communication

- Phone
- Email
- Website

Social

- LinkedIn
- Facebook
- Instagram

Company 360° View

The Company page shall display:

- Company Information
- Contacts
- Opportunities
- Quotations
- Activities
- Emails
- Meetings
- Calls
- Visits
- Documents
- Notes
- Timeline
- Revenue
- Product Interest
- Marketing Campaigns

CHAPTER 3 – CONTACT MANAGEMENT

A company may have multiple contacts.

Example

ABC Manufacturing

- Purchase Manager
- Managing Director

- Finance Manager
- IT Manager

Contact Details

Personal

- First Name
- Last Name
- Gender
- DOB

Professional

- Designation
- Department
- Decision Maker
- Influencer

Communication

- Email
- Mobile
- WhatsApp
- LinkedIn

Preferences

- Preferred Communication
- Preferred Time
- Language

Contact Timeline

Show all:

Calls

Meetings

Emails

WhatsApp

Proposals

Notes

Tasks

CHAPTER 4 – OPPORTUNITY MANAGEMENT

Purpose

Track every potential business separately, even when it belongs to the same company.

Example

ABC Manufacturing

Opportunity 1

ERP

₹25 Lakhs

Negotiation

Opportunity 2

HRMS

₹8 Lakhs

Demo Scheduled

Opportunity 3

Website

₹3 Lakhs

Proposal Sent

CHAPTER 10 – SALES PIPELINE

Lead Created

|
Qualified

|
First Contact

|
Requirement Discussion

Meeting	
Demo	
Proposal	
Negotiation	
PO Expected	
Won	

Lost opportunities should capture a mandatory **Loss Reason** (e.g., price, competitor, budget, postponed, no response).

CHAPTER 11 – BUSINESS RULES

- Lead Number shall be auto-generated.
- One Company can have multiple Contacts.
- One Company can have multiple Opportunities.
- One Opportunity can have multiple Activities.
- Every completed Activity should allow scheduling the next action.
- Duplicate detection should check Company Name, Email, and Mobile.
- Lead cannot be marked as **Won** without at least one Opportunity.
- Opportunity cannot be **Won** without an estimated value.
- Closing an Opportunity as **Won** should allow conversion to a Customer Account and trigger onboarding tasks.
- Every status change should be recorded in the audit trail.

CHAPTER 12 – NOTIFICATIONS

Automatic reminders for:

- Today's Calls
- Overdue Follow-ups
- Upcoming Meetings
- Upcoming Visits
- Demo Schedule
- Proposal Pending
- Opportunity Closing Date
- Inactive Leads (no activity for configurable number of days)

Notifications can be delivered via in-app alerts, email, and optional push notifications.

CHAPTER 13 – REPORTS

Operational Reports

- Lead Register
- Lead Aging Report
- Lead Source Analysis
- Industry-wise Leads
- Product-wise Leads
- Sales Pipeline
- Opportunity Register
- Opportunity Forecast
- Call Register
- Meeting Register
- Visit Register
- Follow-up Due Report
- Missed Follow-up Report
- Lost Opportunity Analysis
- Win Ratio Report
- Salesperson Performance

Management Dashboards

- Pipeline Value
- Expected Revenue by Month
- Conversion Rate
- Average Sales Cycle
- Lead Response Time
- Activity Completion Rate

CHAPTER 14 – DATABASE TABLES

Core entities for this volume:

- `crm_lead`
- `crm_company`
- `crm_contact`
- `crm_opportunity`
- `crm_activity`
- `crm_call`
- `crm_meeting`
- `crm_visit`
- `crm_followup`
- `crm_lead_product`
- `crm_lead_assignment`
- `crm_lead_history`
- `crm_activity_attachment`
- `crm_note`

Each table should include standard audit fields:

- Created By
- Created Date

- Modified By
- Modified Date
- Deleted Flag
- Version Number (for optimistic locking, if used)

CHAPTER 15 – API SPECIFICATIONS

Provide REST APIs for:

Lead APIs

- Create Lead
- Update Lead
- Assign Lead
- Search Leads
- Get Lead Details
- Change Status
- Convert Lead

Company APIs

- Create Company
- Update Company
- Company 360° View

Contact APIs

- Add Contact
- Update Contact
- List Company Contacts

Opportunity APIs

- Create Opportunity
- Update Stage
- Close Opportunity
- Opportunity Forecast

Activity APIs

- Log Activity
- Schedule Follow-up
- List Activities
- Upload Attachments

CHAPTER 16 – ACCEPTANCE CRITERIA

Volume 2 is considered complete when:

1. Lead lifecycle is fully functional from creation to conversion.
2. Duplicate checking works according to business rules.
3. Company and Contact management supports one-to-many relationships.
4. Opportunity pipeline supports configurable stages and probability.
5. All activities (calls, meetings, visits, emails, demos, tasks) are logged with history.

6. Follow-up scheduling and reminders are generated automatically.
7. Company 360° view consolidates all related information.
8. Reports and dashboards reflect real-time pipeline data.
9. APIs are documented and tested.
10. Unit, integration, and user acceptance tests pass successfully.
